2. (continued)

(d) The centre's database currently holds information concerning 15,000 clients.

Calculate how many **bytes** will be required to store **all** records. (Show your working.)

---

---

---

(e) Mirrah wants to produce a paper copy of all females who have booked the mountain biking course.

(i) Describe how this could be done.

---

---

---

---

(ii) In this example, is Mirrah a *data subject*, *data controller* or *data user*?

---

(iii) Describe **two** rights that a data subject has with the *Data Protection Act*.

1 

---

---

2 

---

---

(f) Many databases make use of *computed fields*. What is a computed field?

3. (continued)

(c) Most of Derek's software is *commercial*. Some of it is *shareware*.

(i) What is shareware?

---

---

---

(ii) Why do you think Derek distributes his work as shareware?

---

---

---

(d) Some of Derek's customers download his software, while others receive their copies by post.

State **one** reason why Derek may prefer his customers to download his software.

---

---

---

(e) All of Derek's software includes *on-line help* and *on-line tutorial* facilities.

Which of these facilities should new customers use when they first receive the software? State **one** reason for your answer.
